

Netrust Professional Services & Partners' Solutions

Our Business Is Understanding Client's Needs And Making Technology Work For Them

Netrust is a pioneer in recognising the importance of a security infrastructure requirement for the development of online transactions. Our initial charter was to issue digital certificates to individuals and organisations, after due process of verification of their identities, to foster an environment of trust in the faceless internet space. As a testament to the streamlined business and operational processes within Netrust, the Controller of CA (CCA) awarded the CA License (now Accreditation) to Netrust in June 2001. As an accredited CA, parties relying on Netrust certificates enjoy the benefits of evidentiary presumption and users are assured of the legality and security of their transactions.

Netrust has evolved over the years to become a Security Solutions Provider. We have a whole suite of cryptographic-based security solutions that can optimise any investments in Public Key Infrastructure (PKI) for PKI-based authentication, digital signing and encryption. In addition, Netrust has formed partnerships with key vendors to complement and expand our security solution offerings, and provides the deployment and implementation expertise for their vendors' solutions.

nSign Digital Signing Suite

Netrust's suite of digital signing solutions that uses Public Key Infrastructure (PKI) to establish trusted identities as well as to secure your documents and business processes.

Next-Generation SSL

Netrust's comprehensive certificate lifecycle management solution that combines premium SSL certificates from leading CAs with automated management tools and expert professional services to address the challenges of shortened certificate validity periods and to support the post-quantum era.

Our Partners' Products & Solutions

Netrust is committed to offering our clients the highest level of security products and solutions to protect their identities, data, and business processes. By partnering the industry leaders and innovators in the various fields of security products and solutions, Netrust is able to design, deploy, monitor, and manage customised security solutions for our clients.

Together with our partners, Netrust provides a comprehensive suite of solutions for data and infrastructure security.

NETRUST CONSULTANTS

Netrust's team of experienced consultants can be engaged at any stage of the user requirements process. Our consultants and specialists have been deployed worldwide as part of a broad range of engagements.

ABOUT NETRUST

Netrust is Asia's first public Certificate Authority (CA) and Singapore's only IMDA-accredited CA. Established in 1997, it has been providing digital ID certificates widely used for secure authentication, secure VPN, secure email, digital signing and other applications. Private sector companies and Government agencies such as Building and Construction Authority, Singapore Land Authority and Land Transport Authority employ Netrust's PKI solution in their environment to enhance security and convenience, and to safely complete their electronic transactions on the Internet.
