

Enabling Singpass with Netrust

Netrust has been supporting Singpass integration since its inception, initially with Netrust Authentication Module (NAM) and subsequently with **Singpass Authentication Module (SAM)** when new Singpass interface specifications were introduced. To date, most of the government agencies are connected to Singpass using Netrust's SAM.

As part of the National Digital Identity (NDI) initiative to extend the use of Singpass, GovTech released Login, Myinfo, Myinfo Business, Verify and Sign based on the new OpenID Connect (OIDC) framework.

In support of this initiative, Netrust has built Singpass Authentication Module (SAM) that will handle the OpenID Connect (OIDC) operations required for the integration with Singpass. Netrust SAM acts as the bridge between the company's business application server (Relying Party) and Singpass (OIDC Provider), immediately enabling business applications to be OIDC compliant for a quick and easy integration with Singpass.

Digital Signature with **Sign** and **Sign with singpass**

To complement SAM and support the government initiative to promote digital signing, Netrust also has nSign Digital Signing Suite with a slew of solutions that enable businesses to digitally sign electronic documents using Sign with Singpass. This removes the need for in-person signing and also ensures the integrity and authenticity of the documents. With a flexible integration design, nSign can easily fit into existing business processes reducing time to market.

Benefits of Netrust Singpass Authentication Module (SAM)

Simple-to-Integrate

With simple-to-integrate REST APIs, customers need not understand the complex cryptographic & authentication workflows, and focus on their business application development.

One Product - Multiple Use

Customers has the freedom to integrate all their business applications with any Singpass features to expand and secure a larger customer base using a single product, SAM.

End to End

Singpass integration is beyond software changes. With vast Singpass integration experience, Netrust walk the customers through every single steps of integration ensuring success.

Timely Upgrades

SAM is kept up to date in accordance to all Singpass specification changes, ensuring the customers to be always in compliance with Singpass standards.

Proven solution

Benefitting many Government agencies and private companies, SAM has proven to be a mature product for Singpass related integration.

Flexible Deployment

SAM can be deployed in a cloud or on-premise infrastructure, providing an easy fit to the existing infrastructure of the customer.

ABOUT NETRUST

Netrust is Asia's first public Certificate Authority (CA) and Singapore's only commercial IMDA-accredited CA. Established in 1997, it has been providing digital ID certificates widely used for secure authentication, secure VPN, secure email, digital signing and other applications. Private sector companies and Government agencies such as Building and Construction Authority, Singapore Land Authority and Land Transport Authority employ Netrust's PKI solution in their environment to enhance security and convenience, and to safely complete their electronic transactions on the Internet.
